MINIATURE SMD OSCILLATOR OFFERS OUTSTANDING PERFORMANCE FOR NETWORKING APPLICATIONS

FOR IMMEDIATE RELEASE: April 1st, 2009 San Jose, CA

ITTI is announcing the C2A, our smallest oscillator combining with high stability and unprecedented accuracy. These products are ideal for applications such as set-top box video, sever, networking products, or any application demanding a small footprint, high performance oscillator.

Measuring only 2.0 x 1.6 millimeters, with an ultra-low 0.70- millimeter profile, C2A is the smallest oscillator products available in the market today. It provides an outstanding frequency accuracy and stability of +/-30 PPM over wide operating temperature range from -40°C to +85°C and a tri-state or stand-by option on pin 1. The jitter is measured at 5 picoseconds RMS maximum with start-up time of 10 milliseconds. Supply voltage is offered at a range from +1.8V to +3.0V.

The oscillators are shipped on tape and reel in 2000 piece quantities. Lead time is 8 weeks ARO and the sample is available now. For complete specifications, sample orders and the latest price-availability, contact ITTI at sales@itti-co.com.

Established in 1995, ITTI is a global manufacturer of frequency control products. ITTI offers a significant selection of quartz crystals, crystal oscillators, VCXOs, TCXOs, SAW resonators, filters, and ceramic resonators. The company is ISO-9000 and ISO-14000 certified with facilities in China, Japan, Korea, Singapore, Taiwan, and the USA. ITTI's products are offered direct through regional manufacturers' representatives and franchised distributors.
