HIGH PRECISION OSCILLATOR OCXO SERIES

FOR IMMEDIATE RELEASE.
AUGUST 31, 2011.

ITTI is announcing a new series of High Precision Oscillators - OCXO. These through holes type oscillators are targeting for high end application i.e. Gigabyte Ethernet and Stratum 3E applications.

Measuring at 20.5 x 20.5 millimeters, 25.4 x 20.5 millimeters and 36.2 x 27.3 millimeters, our respective OC10, OC30 and OC36 series is suitable for different customer's board design. These oscillators are available with LVCMOS or LVPECL output from 10.000MHz to 38.880MHz frequency range. It also provides an outstanding frequency accuracy and stability of +/-0.2PPM or +/-6PPB over wide applicable operating temperature range from -40 °C to +85 °C. These oscillators have a good warm up accuracy at +/-10ppb under the specified conditions. Supply voltage is offered at +5.0V to +12.0V respectively. Standard lead time of these oscillators is 8 weeks ARO and the sample is available. For complete specifications, sample orders and the latest pricing, please contact ITTI at sales@itti-co.com.

About ITTI:

Since 1995, ITTI has helped engineers worldwide meet their toughest frequency control needs. We offer a wide selection of quartz crystals, crystal oscillator i.e. OCXOs, VCXOs, TCXOs, SAW Resonators, Filters, and Ceramic Resonators. The company is ISO-9001 and ISO-14001 certified with facilities in China, Japan, Korea, Singapore, Taiwan, and the USA. ITTI's products are offered direct through regional manufacturers' representatives and franchised distributors.
