

ITTI Joins the Computex Taipei 2015

FOR IMMEDIATE RELEASE

HONG KONG – April 9th, 2015

ITTI is delighted to announce that we will be participating in the 2015 Computex Taipei at NanGang Exhibition Hall, Taipei from June 2nd to 6th 2015.

One of the major highlight is our Infrared Touch Free Sensor Module. It is based on Infrared sensing technology and can be used as a ‘no touch’ human-machine interface. The operating principle simply uses two LEDs to emit infrared beams and using hands to reflect the infrared beams to a photodiode. By capturing the differences in signal amplitude and timing, it would enable different gesture recognition thereby producing the require interface system. It is easy to use and suitable for many applications i.e. Tablet, Multimedia player, Digital photo frame etc.

Computex Taipei is considered to be the largest exhibition in Asia which features a great number of exhibitors, analysts and journalists to explore and discuss the latest technologies developments and market trends in the computer industry.

The exhibition aims at providing a platform for the industry manufacturers to gather information as well as business opportunities.

For more information of ITTI, visit us at booth number M0309a. For detail of Computex please visit website: <http://www.computex.biz/>

About ITTI: Founded in 1995, ITTI has been offering a wide range of quartz crystals, crystal oscillators, VCXOs, TCXOs, SAW resonators, filters and ceramic resonators in order to assist and meet engineers' toughest frequency control needs. ITTI's products are easily reached and offered directly through regional manufacturers' representatives and franchised distributors. The company is ISO-9000 and ISO-14000 certified with facilities in China, Japan, Korea, Singapore, Taiwan, and the USA.
